INSTALLATION

1. Remove the two black strapping turntables and the bayonet nut.

2. Clip the packing tape (this machine is suitable for 8-inch core packing tape) into the middle of the turntable. Then install the turntable with bayonet nuts.

3. Lift the entire turntable and embed it into the bracket. Note: Place the end of the turntable without the bayonet nut piece under the brake frame.

4. Pass the strap through the lower end of the white part of the brake lever, gently pull the strap, and lift the brake lever with the strap to pull out the strap.
