

HEAVY DUTY STRAPPING TOOLS

MANUAL NO. 13185

SKU:JFESM00060

OPERATION INSTRUCTIONS

I : Secure small cartons quickly by hand-tightening the buckles with no extra tools needed.

II : For heavier loads, simply use a standard tensioner (not included) with this kit to achieve superior tightness and ensure safe delivery.

① As shown in the picture, the packing strapping is tied around the box, and the two ends of the packing strapping are respectively snapped into the two ends of the buckle.

② Place the lower packing strapping under the lower tooth plate and the cutter body, and slide the upper packing strapping tie into the cutter groove and the spindle groove.

③ While holding the tool with your left hand, push and pull the handle back and forth with your right hand until the packing strapping is tightened.

④ Press down on the handle of the tool with your right hand, and after cutting off the strapping, press the handle tool firmly to the right to remove it.

⑤ Packing is complete.
